The basics of CABIN II are as follows :

For long term, **FORCE CABIN** has been introduced to users as a concept that tool combination is divided into small units and by putting different units together at will, users can get a tool set that is suitable for a certain job focus.

FORCE CABIN II is an enhancement on this idea.

• Proportionate to each other

• A tenon for assembling two cabin boxes.

• Removable cover

For each tool, an exact cut is produced with computer technology which grants easy and quick deployment.

The EVA foam is chemical-based and extremely flexible.

The exact cuts let recognize immediately where each tool is seated. That saves time and money.

Dual color : the upper layer is dark gray, the lower is red.

What is good about FORCE CABIN II ?

- When deployed in the trolleys, Cabin boxes can be assembled with each other perfectly in the drawers without wasting any space.

- When you need one of them for a job mission outside, just take it out and put on the cover.

+

||

- When you need some of them for a job mission outside, you can also put small units together in a cabin box and then put on cover.
